CRYPTOCURRENCY

frontradeassets.com now offers all traders the opportunity to trade a wide range of the top ranked digital coins 24/7.

Today cryptocurrencies have become known to most people as a conventional and popular investment option.

The main purpose of this new technology is to allow people to buy, trade, and invest without the need for banks or any other financial institution.

Cryptocurrencies are highly volatile and can be profitable to any trader's portfolio. Cryptocurrencies are not physical coins they are electronic, a digital asset that remains as data.

The technology behind the cryptocurrency controls a large part of its value which holds new technology on the secure way to identify and transfer money.

The first digital coin introduced was the Bitcoin and today it remains as the standard that all other coins compare themselves to. Following in its steps came Litecoin, so to date they stand as the top 2 highly valued coins on the market.

We believe that the full benefits and potential of cannabis as a medical therapy are within our reach only through supply chain transparency, an engaged and active network of cannabis users, and data that is consistently available and verifiable for medical surveys and for developing and establishing therapies and life-prolonging solutions and treatments on blockchain technology.

Our vision is one in which cannabis medical research gets the support it needs and deserves.

Why trade Cryptocurrencies with frontradeassets.com?

Cryptocurrencies could potentially be the currency of the future with more people gaining interest and price value going up.

Frontradeassets.com offers competitive spreads, with no commissions charged on transactions making it more profitable.

When trading with frontradeassets.com you are trading on the price changes of the digital coin, and not physically purchasing it.

Trading with frontradeassets.com ensures that you will trade with a 100% reputable broker.

REAL ESTATE INVESTMENT

Real estate investment involves the purchase, ownership, management, rental and/or sale of real estate for profit. Improvement of realty property as part of a real estate investment strategy is generally considered to be a sub-specialty of real estate investing called real estate development.

Real estate is an asset form with limited liquidity relative to other investments (such as stocks or bonds that openly trade on financial markets). It is also capital intensive (although capital may be gained through mortgage leverage) and is highly cash flow dependent.

If these factors are not well understood and managed by the investor, real estate becomes a risky investment.

SHARES AND STOCKS

A stock or share (also known as a company's "equity") is a financial instrument that represents ownership in a company or corporation and represents a proportionate claim on its assets (what it owns) and earnings (what it generates in profits).

Stock ownership implies that the shareholder owns a slice of the company equal to the number of shares held as a proportion of the company's total outstanding shares. For instance, an individual or entity that owns 100,000 shares of a company with one million outstanding shares would have a 10% ownership stake in it.

Most companies have outstanding shares that run into the millions or billions.

Gold Investment

Commonly seen as a great store of wealth, this precious metal is also known as a reliable safe-haven asset.

With a rich history amongst almost all global cultures, gold remains a highly popular investment.

Although it has multiple uses, its primary function is typically to hedge against inflation in an often volatile futures market, as well as to diversify existing Precious Metals Investment Retirement Accounts.

Gold has been one of the most valuable precious metals throughout human history, used by elites as a symbol of wealth for centuries due to its rarity and its ability to hold its worth for a long time.

Historically, it has been the most common way to pass on one's wealth as an inheritance from one generation to the next.

Gold is considered a worthy investment, with coins and bars available for purchase in various sizes, ranging from one gram to a whopping 400 ounces.

Being the most reliable investment commodity available, gold has proven to be a perfect way to diversify your investment portfolio and an excellent safeguard against volatile currency.

Funds Management

Started in 2020, the Funds Management business supports new and emerging investment platforms through their launch and growth phases. Funds Management builds on the Company's success in

Investment Management supports the move towards a leader in alternative investing. Leveraging the Group's rich business heritage, global network, and strong financial position, Funds Management provides managers significant investment capital as well as operational and financial support to grow their portfolio. In addition, this platform gives investors access to multiple boutique fund managers through an institutional platform backed by a premier listed financial services company. In recent years the investment industry, and in turn investors, have introduced a new gauge:

Environment, Social and Governance – as a supplement to traditional financial gauges. FRONTRADEASSETS changes are happening faster than ever, reshaping how people live and invest. We believe that ESG factors are going increasingly mainstream and can be used to drive investment outperformance.

Investing for a sustainable future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially

from the issuance of 'green bonds'.

While many in the fixed income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social and governance FRONTRADEASSETS strategies into their portfolios, a task rapidly growing in importance.

Why does it matter?

FRONTRADEASSETS changes are happening faster than ever, reshaping how people live and invest. We believe that FRONTRADEASSETS factors are going increasingly mainstream and can be used to drive investment outperformance.

Making the first step right is crucial to the long road of investments. Of the five steps, the first is to assess your risk tolerance and decide the most suitable asset allocation for yourself.

Different people have different attitudes towards investment. Some are not willing to take any risks or withstand losses, and therefore would rather forgo potentially higher returns. Some are willing to take some risks but tend to avoid huge volatility. Some are willing to take risks in exchange for returns that outperform the markets.

How to gauge one's risk tolerance? Look at your investment horizon. Put it simply, the longer your investment life, the higher the risk you can take because you can afford the time to last a cycle, which helps smooth out short-term volatility. For instance, a young person just starts working, who is still far from retirement, can take more risk.

Sustainable investing

On the contrary, the shorter the investment period, the lower the risk one can take. Assuming you are going to retire next year, and not receiving any regular income, you just do not have the time to recover all losses if your investments take a nosedive all of a sudden.

Besides, your risk tolerance is dependent on your life goals. Ask yourself if you need to set aside funds for your children's education? Are you going to buy a property in the near future? These factors will have an impact on your cash flow. After all, we all need to reserve some cash at all times just in case there are emergencies.

Balancing risk and return is the key to long-term investment isn't it perfect to
